

About us

Our centre has one of the most qualified and experienced team of consultants from various industrial sectors. We make difference in helping the candidate to achieve their professional goals. The courses are practical, interactive and specially designed for the growing needs of such specialised skills.

Our programs are intended for individuals who plan their career in Welding and NDT technology and for the employees who encounter Welding and NDT as part of their daily work. The program outlines the methodology, various applications, practical demonstration, career guidance to groom our candidates with confidence in fundamentals.

Participant has opportunity to visit centre facilities that include Welding Automation lab, Material Simulation lab, Microstructure lab, NDT demonstrations etc.

A team of External Expert Faculties acts as advisory and training partners.

Our programs are designed and implemented for a wide variety of customised curriculum with varying group sizes.

To request a proposal for your customised programs, contact us.
