Program Educational Objectives (PEOs) of B. Tech Biotechnology Program

The program envisages training manpower capable of contributing in the interface between qualitative and descriptive biological insights, and analytical and quantitative engineering methods. The specific objectives of the program are to produce graduates who will be able to: PEO 1: Identify important scientific, technical or societal problems and work towards their solutions PEO 2: Utilize computational tools to solve contemporary challenges in human welfare. PEO 3: Communicate developments in life sciences and engineering to broader audience PEO 4: Pursue higher studies in institutions of repute.
