BE (Metallurgical Engineering)

Programme Educational Objectives (PEO’s)

1. Develop an ability to apply fundamental concepts of science, engineering and metallurgy necessary to formulate, analyze and solve problems associated with metallurgical engineering

2. Prepare students professionally for a successful career meeting the demands of academia, industry and R&D institutions

3. Provide exposure to emerging technologies, adequate training and opportunities to work as a team for the societal, ecological and economical development of newer materials and metallurgical processes.
