Programme Educational Objectives (PEOs)

The objectives of this postgraduate programme are:

1. To prepare students for leveraging the power of modern manufacturing technologies to improve productivity as needed by the manufacturing industries and documenting the learning experiences systematically.

2. To impart skills for using modern equipment/smart machine tools and problem solving techniques to optimize / innovate production processes that can improve the well being of the society and prepare comprehensive reports.

3. To foster research orientation and develop capabilities to pursue independent research among the students to identify and solve socially relevant problems in the domain of manufacturing.
