DEPARTMENT OF PHYSICAL EDUCATION

The Department of Physical Education covers an area of five acres located near the hostel premises. The department has infrastructure for all the indoor and outdoor games. The activities are held throughout the year, every day, from 6.30 am to 6.30 pm.

The department has sufficient facilities for both indoor and outdoor games for the students to practice and to organise high level tournaments. The infrastructure includes Foot ball field, a Hockey field, two Handball courts, two clay courts and one hard court for Tennis, five Volleyball courts, two Ball Badminton courts, two Sepaktakraw courts, two Tennikoit courts, one Kho-Kho court, two Cricket pitches for net practice and one well-maintained pitch for matches. An open air stadium with a stage and a pavilion on both the sides with a balcony which can accommodate about 1000 students is also available.

The facilities in the department enable students to participate in indoor games. There are two games halls with each measuring 80' x 40'. One of the games halls has the provision for playing Table Tennis and Chess. In addition to one old indoor badminton court (80' X 40') which is available with a seating capacity of about 500, two more new courts were established by our management (100'x40') with a seating capacity of 1000. A gym is attached with the other games hall, the gym has been equipped with number of single and multi-stationed machines and other weight training accessories are available to provide the students an arena to keep themselves fit. Apart from these gym equipments, two parallel bars, a pull-ups bar, climbing rope and roman ring are also available for the students to develop their physique.

Every year we organise several programmes for players as well as non-players. We also conduct a compulsory physical education classes for first year students.

INDUSTRY INTERACTION AND IN - PLANT TRAINING

PSG INDUSTRIAL INSTITUTE (PSGII) - TRAINING DEPARTMENT

PSGII, collocated in the college campus, offers a unique opportunity to engineering students, not only for broadening their perspective, but also for an in-depth view and feel of technological, managerial, entrepreneurial, Industrial-finance, manufacturing, testing, quality, administrative, group discussions and placement-oriented skills involved in the functioning of an organization/industry.

INDUSTRIAL TRAINING FOR SANDWICH STUDENTS

Students are provided with industrial training programmes in the four major divisions, viz., the Heavy Engineering Division, Rotating Machinery Division, Electrical Assembly and Neelambur Foundry Division, each of which is a self-contained unit. Other facilities in the Institute include a full-fledged CNC division consisting of turning centers, Machining centers, Laser cutting, TIFAC-CORE (RPT) and Metrology division. A full-fledged Training department works with the dedicated Faculty of the respective Departments, and coordinates the entire training programme.

INDUSTRIAL VISITS AND GUEST LECTURES

Visits to a wide range of industries and technical exhibitions are regularly arranged to keep the students abreast of the conditions prevailing in his / her field of study. Thus the students, undergoing the co-curricular training programmes, get multi-faceted exposure to his / her engineering discipline. In addition, guest speakers from various industries are invited to address sandwich students on various topics of industrial relevance.

INTERNSHIP

Apart from the rich internal content, significant external and real-world exposure is imparted to our students by means of Industrial visits, projects at outside industries, and for Sandwich students, an entire semester of external Industry Internship where students report for three months at a real Industry. Many of our students also opt to do this Internship at overseas companies across the globe, and travel to countries like the USA, UK, Germany, France, Saudi Arabia and Dubai.

This pre-final year Internship prepares students to meet real-life challenges and learn state of the-art global technology and process to add to their core technology foundation.

KAIZEN APPROACH IN TRAINING EFFECTIVENESS

As part of continuous improvement in Training effectiveness, additional training related infrastructure like exclusive study centers for mechanical, electrical & electronics and appliances, maintenance & re-conditioning cells, hands-on experience cells in each division are set up. Executive Skill Development Programme (ESDP) modules are being conducted exclusively for Sandwich students prior to their placement, which enhances their market-readiness, and multiplies their opportunities.

TRAINING METHODOLOGY - BLOOM'S TAXONOMY

The entire Training Curriculum is modeled on the Bloom's Taxonomy Methodology,

imparting the right mix of cognitive, affective and psychomotor skills to the students. This provides students the right blend of skills required to make them Industry-ready, and puts them on the Placement fast-track.

SOFTWARE TOOLS & VIDEO-BASED TRAINING

With all fields of technology using the power of software tools and packages supplemented by video-based training, our Sandwich students are exposed to the power and capabilities of various software tools related to their branches -Production, Mechanical and Electrical&Electronics Engineering. This enables our students to be better prepared to face and manage real-world challenges using the capabilities of such tools.

TRAINING HANDS-ON LABORATORIES

Various hands-on laboratories have been set up within the Training Department where students get to perform hands-on industry-based experiments. These laboratories supplement the actual Industrial Institute sections - Heavy Engineering Division, Rotating Machinery Division and CNC Division. The exclusive Training laboratories include Basic Science, Mechanical and Electrical laboratories, where students acquire manual dexterity and technical skills like sheet metal work, carpentry, plumbing and Basic Foundry practice.

VALUE ADDED COURSES

As a part of their Industrial Training, sandwich students are made to undergo a 30-hour Value Added Course designed and administered by the academic department, consisting of unique hands-on skill-based exercises, software aided design and fabrication using current technology like 3D printing. An assessment is carried out based on which successful students are provided a certificate. Over the 5-year programme, Sandwich students earn four such Value added course certificates which help them in their placement and higher studies.

INNOVATION-LINKED MINI PROJECTS

During their third year Industrial Training, Sandwich students are required to work in teams and come up with innovative mini projects, incorporating innovative ideas, use of technology, prototyping and proof-of-concept demos. Selected mini projects are linked to the Institution Innovation Council display and are awarded certificates and prizes. All projects are graded using appropriate Technology Readiness Level (TRL) levels.

The entire Training Methodology has been customized and fine-tuned to meet the requirements imposed by the present shifting and ever-changing technology scenario, and is designed to provide the Sandwich students with a unique blend of skills and technology that supplement their theory and Laboratory courses.
